

Ascom i75 Handset Accessories

A broad range of genuine Ascom accessories make it easy to adapt this versatile handset to any work environment.

Carrying your handset

Although the i75 handset comes factory equipped with a convenient hinge-type belt clip, an optional swivel clip is also available. A flat cover plate enables your handset to be carried in a shirt pocket or our customized leather case.

Headsets

For convenient hands-free use, Ascom headsets offer a choice of an integrated or boom microphone or our robust headset with hearing protection for noisy environments. Protection plugs are available to keep the headset jack free from moisture and debris when not in use.

Charging

For rapid charging, choose between a desktop charger for single handsets or a wall-mounted rack charger for multiple handsets. Extra battery packs enable continuous handset use and can be charged in the wall-mounted battery pack charger.
