

Ascom Office® T

Cost-effective mobility

Optimum speech quality and ergonomic design plus all the features you need to ensure maximum efficiency.

Full mobility optimizes productivity

The Office T represents a sophisticated portable handset for any environment, combining streamlined design with supreme sound quality for increased efficiency anywhere in the enterprise. Equipping your key workers with Ascom portable handsets means incoming calls are handled more quickly. Workers are able to move around to gather information and answer questions while staying in constant contact with customers.

Easy to use, easy to access

The Office T features a durable keypad with large buttons and five navigation keys. A programmable function key supports hands-free speech to enhance productivity and access to voice-mail. The high contrast display presents a large, back-lit viewing area that provides exceptional viewing clarity and readability in all lighting conditions. The Office T features a flexible menu that can be set to 17 different languages.

Convenient features

The phone book stores up to 100 numbers and the last 20 dialed, answered and missed calls are all available for speedy redial. The phone book can be updated either directly in the portable handset or with the Cordless Phone Manager software tool. An integrated speakerphone provides hands-free functionality, the vibration mode discreetly alerts you to incoming calls and, thanks to an integrated alarm clock, you'll never miss an appointment. The Office T also supports all standard PBX functions and can access teleservices.

Meeting the needs of your enterprise

When you need reliable wireless communication, Ascom has a solution to meet your demands. Easy-to-use and competitively priced, the Office T provides enterprises a cost-effective option to maximize the efficiency of customer interactions. For more information on how an Ascom solution can benefit your enterprise, contact us today at 877-71ASC.COM.

OfficeT features at a glance

Hands-free speech. A loudspeaker on the back of the portable handset offers excellent sound quality and can be used for hands-free speech and conference calling.

Vibration alert. For noisy environments or when discretion is required, vibration alert makes silent calls “heard”.

Phone book. Contains up to 100 names and numbers. Entries can be added, deleted or modified directly in the portable handset or by using Cordless Phone Manager software. Supports Call-by-Name and Quick Call-by-Name for fast access.

Redial. Enables you to redial the last 20 dialled, answered and missed calls.

Missed call function. In idle mode, a “Who Called?” warning is displayed if there have been missed calls.

Mute function. Press the Mute button to disconnect the microphone during a call.

Illuminated graphic display. Two lines of text with twelve characters each and one line of status icons are shown in the illuminated display.

Handset and key lock. Protect the handset against misuse using a PIN code. Avoid accidental calls using the key lock.

Alarm clock. Avoid missing appointments or deadlines. You cannot miss when the portable handset starts to vibrate and ring, and the warning and display lights start to flash.

Personalize your portable handset. Personalize your portable by selecting settings such as key click sound, discrete ringing, melody selection, vibrating alert, key lock, PIN code, language, display contrast, display backlight, ring volume, phone lock, and more.

Advanced system features. Features are system dependent and may require additional equipment.
